SUMMARY

High-performing IT undergraduate (**9.29 CGPA**) and multi-hackathon winner with expertise in Data Structures, Full-Stack, and IoT development. Skilled in building scalable applications using **Java**, **Python** and **Supabase**.

TECHNICAL SKILLS

Languages: Java, Python, C, SQL, JavaScript

Web & Frameworks: React.js, Flutter, Flask, Django, HTML, CSS, JS

Databases & Cloud: MySQL, Oracle, Supabase

Developer Tools & Libraries: Git, GitHub, VS Code, IntelliJ IDEA, Vercel, pandas, NumPy, Matplotlib

Core Concepts: Data Structures & Algorithms (DSA), DBMS, OOP, OS, Computer Networks

PROJECTS

Med Torque | Voice Escalation System | *Python, Flask, Twilio API, TTS, Supabase* Feb 2026

- Developed an automated voice reminder system delivering human-like phone calls for task and medication alerts.
- Implemented real-time confirmation and caregiver escalation logic to ensure patient safety and reliability.

Mission Millets | AgriTech Marketplace | *React, TypeScript, Supabase, Tailwind, Vercel* Dec 2025

- Engineered a web platform connecting millet farmers directly with buyers to eliminate middleman costs.
- Built secure cloud data management with farmer registration, product listings, and seamless Vercel deployment.

Bharat Box | Industrial IoT Monitor | *ESP32, LoRaWAN, React, Node.js, Express* Sep 2025

- Built an IoT machine health monitoring system to detect equipment faults in real time using ESP32 sensors.
- Implemented long-range LoRaWAN communication and created a web dashboard to track equipment status.

ACHIEVEMENTS & HONORS

1st Place – Info VIT Hackathon: Awarded top position in the Healthcare Innovation track for engineering *Med Torque*, an AI-driven automated voice escalation reminder platform.

3rd Place (National Level) – National Agritech Hackathon: Recognized among nationwide participants at RVR & JC College for developing *Mission Millets*, a direct farmer-to-buyer marketplace.

3rd Place & Finalist – SparkTank 2.0 & College Research Day: Won dual honors for presenting *Bharat Box*, an IoT-based industrial machine health and predictive maintenance monitor.

CERTIFICATIONS

Kaggle: Python Certification – Validated core data processing, object-oriented logic, and algorithmic problem-solving.

NPTEL: Artificial Intelligence & Knowledge Representation – Comprehensive coursework on AI search algorithms, logic, and reasoning.

EduSkills Platform: DevOps & Cloud Automation Virtual Internship – Hands-on experience in CI/CD pipelines, containerization, and cloud infrastructure management.

EDUCATION

Vishnu Institute Of Technology Bhimavaram, AP
B.Tech in Information Technology | CGPA:9.29 2024 - 2028

Pragati Junior College Tanuku, AP
Intermediate MPC | Percentage:95.6 2022 - 2024

Infant Jesus E.M High School Penugonda, AP
SSC | Percentage:92.6 2022

LEADERSHIP & ACTIVITIES

Hackathon Team Lead: Guided cross-functional engineering teams through end-to-end development, project scoping, and technical pitches, securing 4 top-tier hackathon awards.

PR Core Member (DO IT Club): Coordinated campus technical events, managed student outreach campaigns, and handled communication logistics for workshops and competitions.

Class Group Representative (GR): Served as primary academic liaison between faculty and 60+ students, facilitating schedule coordination and student advocacy.
